

ENGINEERING PERFORMANCE. DELIVERING DURABILITY.

CUSTOMISED CEMENT & CONCRETE SOLUTIONS FOR
HIGHER STRENGTH, LOWER COST AND SUSTAINABLE GROWTH

ABOUT US

SAB Chemicals established in 2022, is a startup in the manufacturing of cement and concrete solutions. Our team comprising of R&D specialists and talent is dedicated to offering our customers customised solutions to meet individual project/plant specificity.

We provide complete end-to-end products and services for customers including customised product research and development, laboratory testing, commercial testing and any additional support services based on subsequent customer requirements. We also provide complete arrangements for storage and dosing systems based on project/plant needs.

OUR MISSION

TO DESIGN AND DELIVER GREEN SOLUTIONS FOR THE **CONSTRUCTION INDUSTRY**.

MAJOR CUSTOMERS

WHY INDUSTRY LEADERS

CHOOSE US

CONSISTENT PERFORMANCE
EVERY BATCH IS TESTED AND VALIDATED

PAN - INDIA SUPPLY NETWORK
CENTRAL MANUFACTURING LOCATION FOR A PAN INDIA ACCESS

COST OPTIMIZATION
LOWER POWER, HIGHER OUTPUT, BETTER MARGINS

TECHNICAL SUPPORT
ON-SITE TRIALS & OPTIMIZATION SUPPORT

CUSTOM FORMULATIONS
TAILORED FOR YOUR CLINKER, CEMENT & PROCESS

We don't just sell chemicals — we deliver **measurable plant performance improvements.**

CEMENT MANUFACTURING SOLUTIONS

For higher output, better cement quality & lower energy cost

SAB Cem Series – Cement Grinding Aids

Boost mill productivity, improve cement fineness and enhance strength development.

SAB HR Series

Speciality chemicals that coat cement particles to repel moisture, improving shelf life, flowability and performance in humid and monsoon-prone environments.

CONCRETE PERFORMANCE SOLUTIONS

For stronger, more workable and more durable concrete

Admixtures Portfolio

AdCrete L20 – Cost efficient superplasticizers for reliable everyday concrete.

AdCrete H40 – High performance super plasticizers for high-strength and self compacting concrete.

AdCrete M30 – Balanced super plasticizers for improved flow and higher strength.

AdCrete H60 – Fast setting, high early strength solutions for faster demoulding and smoother finishes in precast setting.

AdCrete ACL– Speed up setting and early strength gain for rapid construction and cold weather concreting.

AdCrete MR– High quality mould release formulations that ensure smooth demoulding, superior surface finish and longer mould life in concrete and precast production.

AdCrete MS – Ultra fine mineral additive that delivers higher strength, lower permeability and superior durability.

AdCrete RT– Control setting time for hot weather, long distance transport and mass concrete pours.

DURABILITY & PROTECTION SYSTEMS

For long-lasting, maintenance-free structures

AdCrete CR – Protect reinforcement steel and extend structural life.
